

Dear Parents/Carers,

Year 11 have been working extremely hard in Maths lessons this half term and it is really important that the momentum continues over the half term holiday.

To assist students in their mock exams and to aid revision, students have been given 3 booklets of different resources.

Booklet 1 was handed out on 3rd October. This booklet includes examples of key topics along with questions for students to complete based on the examples. There is also a QR code for each topic which leads students to videos of how to complete the questions.

Booklet 2 was handed out this week. This booklet has three practice exam papers which have a QR code at the start so that students can mark their own work and see how the questions could be attempted if they are unsure.

Booklet 3 was handed out this week. This booklet includes '5 a day' sheets which students have been answering before school. There are enough sheets to complete each day Monday – Friday during the half term holiday. The QR codes at the front of the booklet give students a link to the answers so they can mark their work.

Half Term Intervention

I will be completing intervention sessions during the half term holiday on Tuesday 24th October 10am-12pm for foundation tier students, and 12.30pm – 2.30pm for higher tier students. Both of these will be in F14, and I will be going through exam questions.

Saturday Mornings

Online Teams lessons will be taking place on a Saturday morning in the lead up to the mock exams based on topics that are most assessed in the GCSE exams. These sessions will be at the following dates and times:

Date	9am-9.50am	10am-10.50am
Saturday 28th October	Linear Equations	Index Laws
Saturday 4th November	Prime Factors and HCF/LCM	Completing the Square
Saturday 11th November	Dividing Ratios	Functions

These sessions will take place on Microsoft Teams and all students will be able to attend as invites will go out on the Year 11 whole year group Team. Sessions will be recorded so if your child is unable to attend on this specific day, they will be able to go over these again in their own time.

Students also have access to the Sparx Maths website should they wish to use either of this for their revision.

If you have any queries regarding your child's Maths lessons or interventions, please do get in touch with me or their maths teacher.

Yours sincerely,

Mrs Billings
Head of Maths
